CONTOUR DS

SHAPING THE FUTURE OF DATA MANAGEMENT

As the world is redefined by technology, creating new priorities for every business and driving new imperatives for every IT organization, Contour speeds our customers' digital transformation, empowering them to compete and succeed with software that reinvents the foundation of computing and mobile user experiences.

ABOUT CONTOUR DATA SOLUTIONS

OUR MISSION

Contour is one of the fastest growing, Philadelphia-based technology companies, and our amazing team is at the center of everything we do. Our philosophy is simple: *get it done*. We stay flexible as a company and care deeply about supporting our employees to ensure they feel proud of their contributions. As a result, our team collaboration, passion, and focus allows us to deliver truly customer-centric solutions.

OUR BUSINESS

Professional Services

Contour provides flexible infrastructure solutions to meet the challenges of doing business in today's data-driven economy. Our strategic solutions are composed of best-of-breed technologies and expert integration, complemented with exceptional consulting services. We enable your company to address universal challenges such as tiered storage optimization, backup & recovery management, regulation compliance, specialized branch office solutions and virtualized infrastructures.

Cloud Solutions

Cloud is a strategy; not a place. We believe in the Cloud ECO-System. Cloud needs to make sense. We own and operate our own platforms deploying enterprise based technologies to support offerings that include IaaS, DRaaS, BaaS, DTaaS, DaaS and DBaaS. Our offering also assures companies the most secure virtual private cloud experience with guaranteed application performance across the network. Our architecture is flexible, allowing customers to remain in control. Contour has customizable options for private, public, and hybrid cloud experience.

Managed Services

IT is gray, not black and white, and while providers claim to be a boutique they often force you to live within boundaries. Contour delivers a suite of customizable Managed Services to help you tackle these challenges, including a 24/7/365 Tier 2 Network Operations Center. Contour Managed Services provides ongoing management of your infrastructure so you can focus on your applications. By implementing best practices to maintain your infrastructure, we help our customers reduce operational overhead and risk. We automate common activities such as change requests, monitoring, patch management, security, and backup services, and provides full-lifecycle services to provision, run, and support your infrastructure. Our rigor and controls help to enforce your corporate and security infrastructure policies, and enable you to develop solutions and applications using your preferred development approach. We pride ourselves on our ability to help businesses reduce costs, and unburden you from infrastructure operations so you can direct resources toward differentiating your business.
